

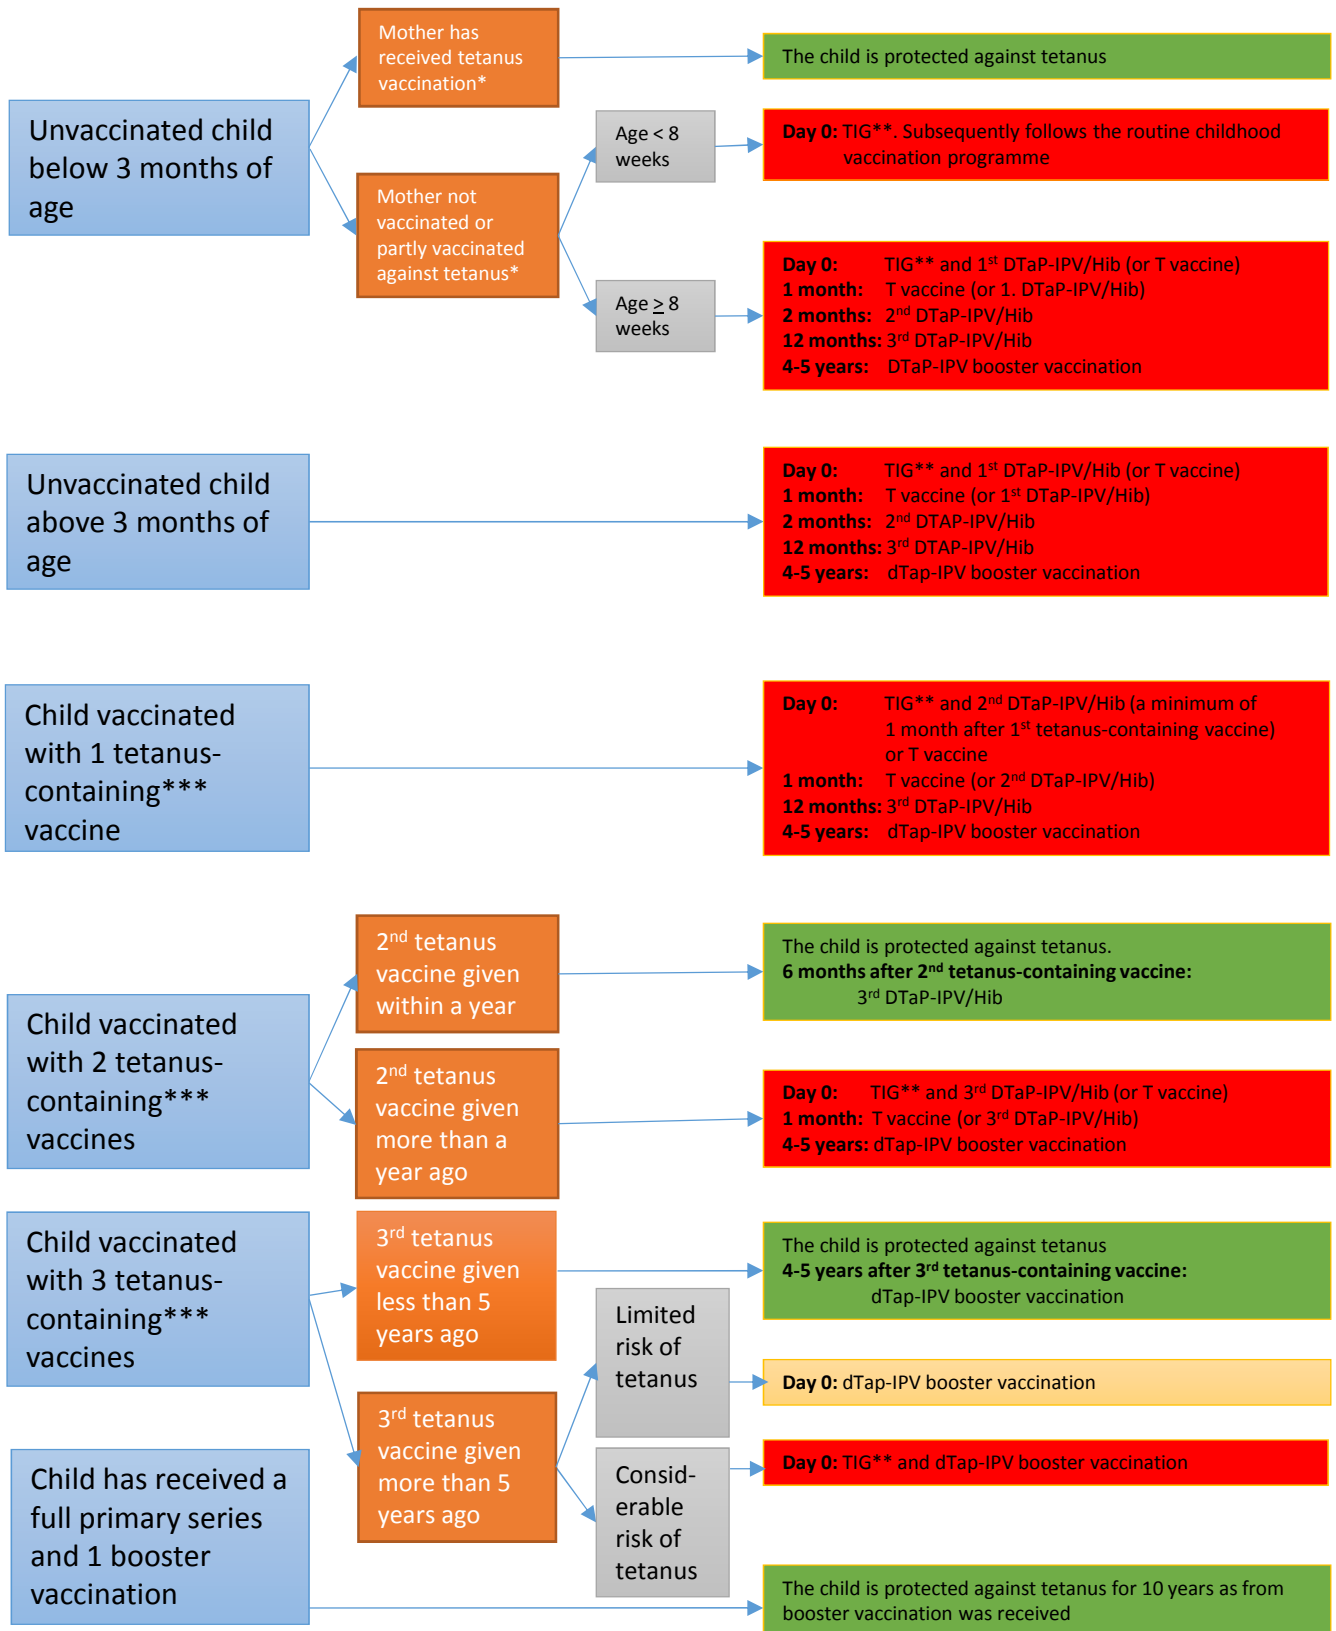

Diagram 1. Tetanus prophylaxis after wound injury in children aged 0-9 years

* By "vaccinated against tetanus" we mean a full primary vaccination series including 3 doses of tetanus-containing vaccine and booster vaccination within 10 years or full primary vaccination within 5 years.

**TIG = tetanus immune globulin. When TIG is given in connection with the initiation of completion of a primary vaccination series, an extra dose of tetanus vaccine shall be given 1 month later.

***Normally as a DTaP-IPV/Hib primary vaccine, alternatively as DTP/DTaP vaccine
