

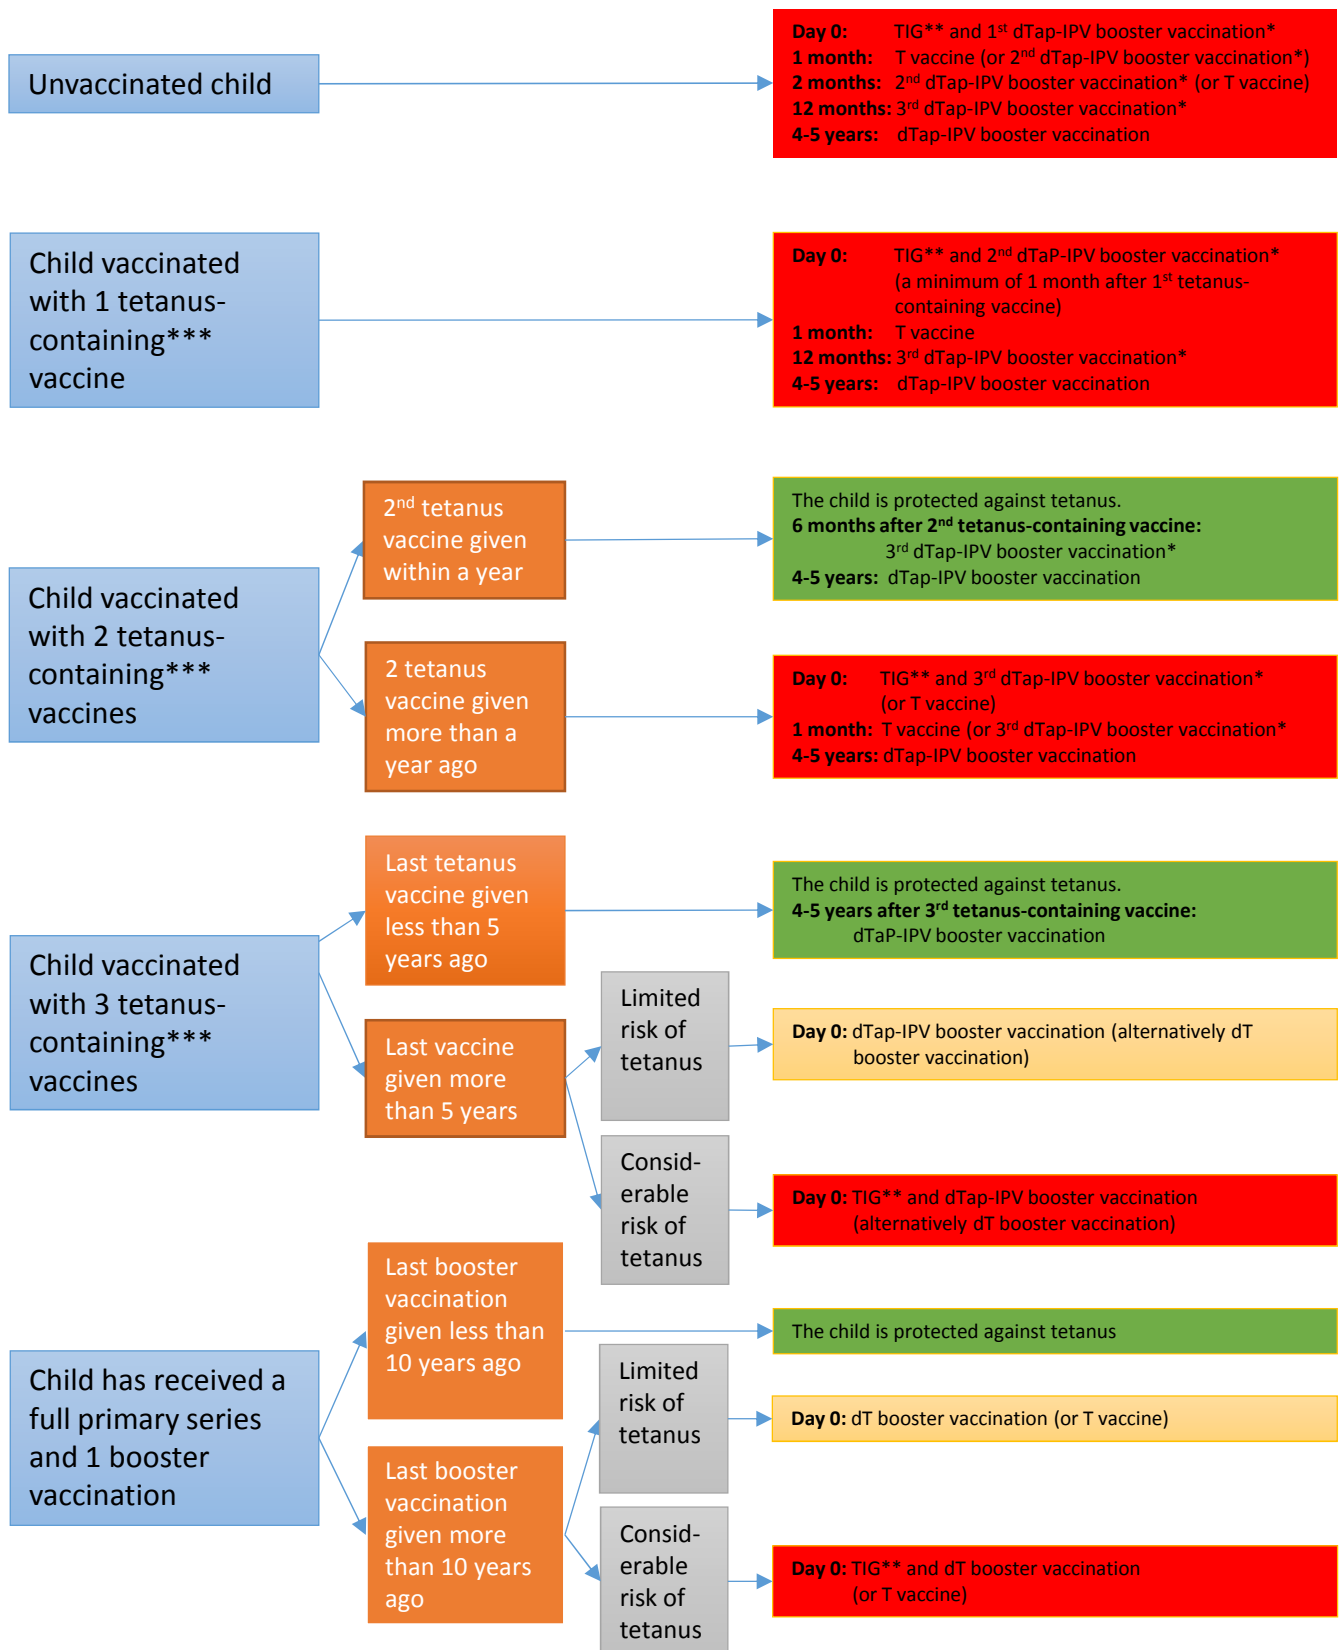

Diagram 2. Tetanus prophylaxis after wound injury in children aged 10-17 years

*Booster vaccination may be used for primary vaccination, EPI-NEWS 5a/15.

**TIG = tetanus immune globulin. When TIG is given in connection with the initiation or completion of a primary vaccination series, an extra dose of tetanus vaccine shall be given 1 month later.

***Normally as DTaP-IPV/Hib primary vaccine, alternatively as DTP/DTaP vaccine or dTap-IPV vaccine.
