

Individually notified diseases 2020

No. 11/17, 2021

This annual report includes the number of individually notifiable diseases with onset in 2020. The figures may be adjusted later due to late notifications or new information. Totals for 2019 and the annual average for the 5-year period 2015-2019, with the lowest and highest number of annual cases during this period, are given for comparison.

No cases of haemorrhagic fever, plague, polio or rabies were notified.
